INTELLIGENT VOICE DISCLAIMER

© 2018 Intelligent Voice. All rights reserved.

Intelligent Voice believes the information in this publication is accurate as of its publication date. The information is subject to change without notice. The information in this publication is provided “as is”. Intelligent Voice makes no representation or warranties of any kind with respect to the information in this publication and specifically disclaims implied warranties of merchantability or fitness for a particular purpose. Using, copying, and distribution of any Intelligent Voice software described in this publication requires an applicable software license.

THE INFORMATION CONTAINED IN THIS DOCUMENT IS THE PROPRIETARY AND CONFIDENTIAL INFORMATION OF INTELLIGENT VOICE LIMITED. YOU MAY NOT DISCLOSE, PROVIDE OR MAKE AVAILABLE THIS DOCUMENT, OR ANY INFORMATION CONTAINED IN THIS DOCUMENT, TO ANY THIRD PARTY, WITHOUT THE PRIOR WRITTEN CONSENT OF INTELLIGENT VOICE LIMITED.

The information in this document is provided for use with Intelligent Voice products. No licence, express or implied, to any intellectual property associated with this document or such products is granted by this document.

All Intelligent Voice products described in this document are owned by Intelligent Voice Limited (or those companies that have licensed technology to Intelligent Voice) and are protected by patents, trade secrets, copyrights or other industrial property rights.

The Intelligent Voice products described in this document may still be in development. The final form of each product and release date thereof is at the sole and absolute discretion of Intelligent Voice. Your purchase, license and/or use of Intelligent Voice products shall be subject to Intelligent Voice’s then current sales terms and conditions.

Table of Contents

Main Features 4.0.0	4
Main Features 4.0.1	4
Known Bugs	4

New Features in 4.0.0

New sources for import

Import direct from HTTP(S) and FTP

Specify individual files on local filesystem (previously required directories)

Import notifications

Send email notifications on completion of an import

ASR model Switching

Language model can be specified for each import. This means you can have multiple jobs running at the same time, each using different ASR models.

Transcript Editor APIs

New APIs to support editing transcripts

Ubuntu 16.04

Support for installation on Ubuntu 16.04

Bug fixes

Fix for slow performance merging multi-channel transcripts. Support for larger files.

getImportList() API method now includes duration. Support for new GPU cards. Security fixes including updating Drupal to 7.59.

New Features in 4.0.1

V2 API

New more REST-like API

Updated ASR engine

Accuracy and stability improvements

Red Hat 7.4 – beta

Beta support for installation on Red Hat 7.4

New Import options for multi-channel audio

Diarization can now be enabled or disabled for each import. Option to merge with the same content on multiple channels per import.

Relativity upload

Support for continuous uploading to Relativity

Minor fixes

Removed dependency on rsync. Fix for imports not marked as complete. Fix for numeral conversion. Downloading item from JumpTo now gives a SmartTranscript.

Known Issues

The following known issues are expected to be addressed in a future release:

Automatic Topics

[INT-2411] Topics can be created without matching a location in the item

[EB-30] Automatic Topics are only available in English, Spanish and Portuguese

Intelligent Voice API

[INT-2059] getGroupDetails method is slow with a large number of items in a group

JumpTo web application

[INT-2294] Hypertree navigation buttons display incorrect tags

[INT-1982] Large imports and exports cause JumpTo to time out and show an generic error message. The operation is processed correctly despite the message.

[INT-2274] The People map is incorrectly reporting the number of items per person

[INT-2396] First group has to be created via API - create new group in JumpTo does not work if there are no existing groups

[INT-2409] audit report is not shown when there are no entries (i.e. for newly created users)

[INT-2194] import page does not refresh to show status of import
