Language Model Builder

Improved Language Model Builder now running on Ubuntu 16.04

Known Issues

The following known issues are expected to be addressed in a future release:

Automatic Topics

[INT-2411] Topics can be created without matching a location in the item

[EB-30] Automatic Topics are only available in English, Spanish and Portuguese

Intelligent Voice API

[INT-2059] getGroupDetails method is slow with a large number of items in a group

JumpTo web application

[INT-1982] Large imports and exports cause JumpTo to time out and show an generic error message. The operation is processed correctly despite the message.

[INT-2272] Phonetic search pagination not working

[INT-2274] The People map is incorrectly reporting the number of items per person

[INT-2396] First group must be created via API - create new group in JumpTo does not work if there are no existing groups

[INT-2409] audit report is not shown when there are no entries (i.e. for newly created users)

[INT-2194] import page does not refresh to show status of import
